Investment Strategy

The Fund generally invests in companies with market capitalizations of \$1 billion or more at the time of purchase. In selecting securities for the Fund, LSV focuses on companies whose securities, in LSV's opinion, are out-of-favor in the marketplace at the time of purchase, but show signs of recent improvement. LSV seeks to manage volatility by selecting stocks for the Fund's portfolio whose total returns are not expected to fluctuate as dramatically as those of the equity markets as a whole.

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please call 888-FUND-LSV (888-386-3578).

Investing involves risk including loss of principal. The portfolio is subject to stock market risk, meaning stocks in the portfolio may decline in value for extended periods due to the financial prospects of individual companies or due to general market and economic conditions. Diversification does not prevent all investment losses. Current and future holders are subject to risk.

This information must be preceded by or accompanied by a current summary or full prospectus. Please read it carefully before investing or sending money.

*The Fund's Adviser has contractually agreed to waive fees and reimburse expenses until February 29, 2018. In the absence of such fee waivers, total return would be reduced.

**Dividend Yield is an indication of the annual dividend income projected to be generated by the portfolio of stocks held by the Fund. To calculate the expected annual dividend of a security held by the Fund, the most recent dividend payment is multiplied by the expected frequency over a year. The Dividend Yield for the Fund is the sum of the dividend yields of the underlying securities of the Fund divided by the most recent applicable NAV of the Fund expressed as a percentage. The Fund's Dividend Yield may vary from this projection and will be reduced by the Fund's expenses.
