THE ADVISORS' INNER CIRCLE FUND

LSV

LSV Disciplined Value ETF

Ticker Symbol: LSVD

Summary Prospectus | December 11, 2024

Before you invest, you may want to review the Fund's complete prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at www.lsvasset.com/value-equity-fund/. You can also get this information at no cost by calling 1-888-FUND-LSV (1-888-386-3578), by sending an e-mail request to lsvfunds@seic.com, or by asking any financial intermediary that offers shares of the Fund. The Fund's prospectus and statement of additional information, both dated December 11, 2024, as they may be amended from time to time, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website, phone number or e-mail address noted above.

INVESTMENT OBJECTIVE

The LSV Disciplined Value ETF (the “Fund”) seeks long-term growth of capital.

FUND FEES AND EXPENSES

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees, including to financial intermediaries, which are not reflected in the table and Example below.

Annual Fund Operating Expenses¹

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.40%
Other Expenses ²	<u>0.00%</u>
Total Annual Fund Operating Expenses	0.40%

¹ LSV Asset Management (the “Adviser” or “LSV”), the Fund’s investment adviser, will pay all of the Fund’s expenses, except for the following: the advisory fee, interest, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, non-routine expenses, and distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act, as amended (the “1940 Act”), litigation expenses, and other non-routine or extraordinary expenses.

² Other Expenses are based on estimated amounts for the current fiscal year.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain at current levels. This example does not include the brokerage commissions that investors may pay to buy and sell shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years
\$41	\$128

Portfolio Turnover

The Fund pays transaction costs, such as brokerage commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the Example, affect the Fund’s performance. Further, by writing covered call options, the Fund’s portfolio securities are susceptible to being called by the holder of the option, thereby creating a likelihood of additional portfolio turnover. Because the Fund has not commenced investment operations as of the date of this prospectus, it does not have portfolio turnover information to report.

PRINCIPAL INVESTMENT STRATEGIES

The Fund is an actively managed exchange-traded Fund (“ETF”). Under normal circumstances, the Fund invests at least 80% of its net assets, plus any borrowings for investment purposes, in equity securities. This investment policy can be changed by the Fund upon 60 days’ prior written notice to shareholders. The equity securities in which the Fund invests are mainly common stocks. Although the Fund may invest in securities of companies of any size, the Fund generally invests in companies with market capitalizations of \$1 billion or more at the time of purchase.

In selecting securities for the Fund, the Adviser focuses on companies whose securities, in the Adviser's opinion, are out-of-favor (undervalued) in the marketplace at the time of purchase in light of factors such as the company's earnings, book value, revenues or cash flow, but show signs of recent improvement. The Adviser believes that these out-of-favor securities will produce superior future returns if their future growth exceeds the market's low expectations.

The Adviser uses a quantitative investment model to make investment decisions for the Fund. The investment model ranks securities based on fundamental measures of value (such as the price-to-earnings ratio) and indicators of near-term appreciation potential (such as recent price appreciation). The investment model selects stocks to buy from the higher-ranked stocks and selects stocks to sell from those whose rankings have decreased, subject to overall risk controls. The Adviser manages the Fund conservatively relative to the S&P 500 Index by implementing a low tracking error strategy to the benchmark and further restricting the investment model with respect to (1) industry and sector weights to a maximum of +/- 5% the benchmark weight and (2) security weightings by a maximum of +/- 3% the benchmark weight.

PRINCIPAL RISKS

As with all funds, a shareholder is subject to the risk that his or her investment could lose money. **A Fund share is not a bank deposit and is not insured or guaranteed by the FDIC or any other government agency.** You should consider your investment goals, time horizon, and risk tolerance before investing in the Fund. The principal risk factors affecting shareholders' investments in the Fund are set forth below.

Active Management Risk – The Fund is subject to management risk because it is an actively managed portfolio. In managing the Fund's portfolio securities, the Sub-Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these will produce the desired results.

Equity Risk – The risk that stock prices will fall over short or extended periods of time, sometimes rapidly and unpredictably. The value of equity securities will fluctuate in response to factors affecting a particular company, as well as broader market and economic conditions. Broad movements in financial markets may adversely affect the price of the Fund's investments, regardless of how well the companies in which the Fund invests perform. Moreover, in the event of a company's bankruptcy, claims of certain creditors, including bondholders, will have priority over claims of common stock holders such as the Fund.

Market Risk – The prices of and the income generated by the Fund's securities may decline in response to, among other things, investor sentiment, general economic and market conditions, regional or global instability, and currency and interest rate fluctuations. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. Market risk may affect a single issuer, an industry, a sector or the equity or bond market as a whole.

Value Investing Risk – The Fund pursues a "value style" of investing. Value investing focuses on companies whose stock appears undervalued in light of factors such as the company's earnings, book value, revenues or cash flow. If the Adviser's assessment of market conditions, or a company's value or prospects for meeting or exceeding earnings expectations is inaccurate, the Fund could suffer losses or produce poor performance relative to other funds or market benchmarks. In addition, "value stocks" can continue to be undervalued by the market for long periods of time, and may never achieve the Adviser's expected valuation.

ETF Risks – The Fund is an ETF and, as a result of this structure, it is exposed to the following risks:

- **Trading Risk** – Shares of the Fund may trade on the Exchange above (premium) or below (discount) their net asset value ("NAV"). In stressed market conditions, the market for Fund shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings, which may increase the variance between the market price of the Fund shares and the

value of its underlying holdings. In addition, although the Fund's shares are currently listed on the Exchange, there can be no assurance that an active trading market for Fund shares will develop or be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares of the Fund inadvisable.

- **Cash Transactions Risk** – Like other ETFs, the Fund sells and redeems its shares only in large blocks called Creation Units and only to “Authorized Participants.” Unlike many other ETFs, however, the Fund expects to effect its creations and redemptions at least partially for cash, rather than in-kind securities. Thus, an investment in the Fund may be less tax-efficient than an investment in other ETFs as the Fund may recognize a capital gain that it could have avoided by making redemptions in-kind. As a result, the Fund may pay out higher capital gains distributions than ETFs that redeem in-kind. Further, paying redemption proceeds at least partially in cash rather than through in-kind delivery of portfolio securities may require the Fund to dispose of or sell portfolio investments to obtain the cash needed to distribute redemption proceeds at an inopportune time.
- **Limited Authorized Participants, Market Makers and Liquidity Providers Risk** – Because the Fund is an ETF, only a limited number of institutional investors (known as “Authorized Participants”) are authorized to purchase and redeem shares directly from the Fund. Retail investors cannot transact directly with the Fund. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace to transact in Fund shares. As a result of these and other considerations, Fund shares may trade at a material discount to its NAV. In addition, the Fund may face possible delisting if: (i) Authorized Participants exit the business or otherwise become unable to process creation and/or redemption orders and no other Authorized Participants step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

Quantitative Investing Risk — There is no guarantee that a quantitative model or algorithm used by the Adviser, and the investments selected based on the model or algorithm, will perform as expected or produce the desired results. The Fund may be adversely affected by imperfections, errors or limitations in the construction and implementation of the model or algorithm and the Adviser's ability to properly analyze or timely adjust the metrics or update the data underlying the model or features of the algorithm.

Large-Capitalization Company Risk – The large capitalization companies in which a Fund may invest may lag the performance of smaller capitalization companies because large capitalization companies may experience slower rates of growth than smaller capitalization companies and may not respond as quickly to market changes and opportunities.

Mid-Capitalization Company Risk – The mid-capitalization companies the Fund invests in may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, investments in these medium-sized companies may pose additional risks, including liquidity risk, because these companies may have limited product lines, markets and financial resources, and may depend upon a relatively small management group. Therefore, the mid-capitalization stocks may be more volatile than those of larger companies. These securities may be traded over-the-counter or listed on an exchange.

New Fund Risk – Because the Fund is new, investors in the Fund bear the risk that the Fund may not be successful in implementing its investment strategy, may not employ a successful investment strategy, or may fail to attract sufficient assets under management to realize economies of scale, any of which could result in the Fund being liquidated at any time without shareholder approval and at a time that may not be favorable for all shareholders. Such liquidation could have negative tax consequences for shareholders and will cause shareholders to incur expenses of liquidation.

PERFORMANCE INFORMATION

The Fund is new, and therefore has no performance history. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's returns and comparing the Fund's performance to a broad measure of market performance. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Current performance information is available by calling the Fund at 1-888-FUND-LSV.

INVESTMENT ADVISER

LSV Asset Management is the Fund's investment adviser.

PORTFOLIOS MANAGERS

Josef Lakonishok, Ph.D., CEO, CIO, and Partner, has managed the Fund since its inception in 2024.

Menno Vermeulen, CFA, Partner, has managed the Fund since its inception in 2024.

Puneet Mansharamani, CFA, Partner, has managed the Fund since its inception in 2024.

Greg Sleight, Partner, has managed the Fund since its inception in 2024.

Guy Lakonishok, CFA, Partner, has managed the Fund since its inception in 2024.

PURCHASE AND SALE OF FUND SHARES

The Fund issues shares to (or redeems shares from) certain institutional investors known as "Authorized Participants" (typically market makers or other broker-dealers) only in large blocks of at least 20,000 shares known as "Creation Units." Creation Unit transactions are conducted in exchange for the deposit or delivery of a portfolio of in-kind securities designated by the Fund and/or cash.

Individual shares of the Fund may only be purchased and sold on the Exchange, other national securities exchanges, electronic crossing networks and other alternative trading systems through a broker-dealer at market prices. Because Fund shares trade at market prices rather than at NAV, Fund shares may trade at a price greater than NAV (premium) or less than NAV (discount). When buying or selling shares in the secondary market, you may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) (the "bid-ask spread"). Recent information regarding the Fund's NAV, market price, premiums and discounts, and bid-ask spreads is available at www.lsvasset.com.

TAX INFORMATION

The Fund intends to make distributions that may be taxed as qualified dividend income, ordinary income or capital gains if you are not investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account ("IRA"), in which case your distribution will be taxed when withdrawn from the tax-deferred account.

PAYMENTS TO BROKER DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
